

VCT

Floor Care Instructions

IMPORTANT

Congratulations on your new flooring installation from Real Floors!

Please follow these instructions to maintain the manufacturer & installation warranties.

Sweep or vacuum floor prior to cleaning removing any dust or debris. When using a vacuum cleaner, disengage the beater bar or use the “bare floor” setting to avoid damaging your flooring.

Clean with a damp mop at least once a week. Use a neutral pH detergent solution. Mop heavy-traffic areas more frequently.

Depending on the type of VCT, it is good to periodically recoat the finish. Please read the manufacturers recommendations.

Any buffing, spray buffing, conditioning, restoring and burnishing or scrubbing procedure should be done professionally. Read manufacturers recommendations carefully.

Do not use scouring pads, steel wool, sandpaper or other abrasive products.

Floor mats should be labeled non-staining. Oil or petroleum based products can result in discolorations.

Limit direct sunlight for prolonged periods of time with use of blinds, shades, or awnings.
